

# ESA Virtual Visits

This flexible virtual educational visit experience option is for Pre-K-2<sup>nd</sup> grade, and comes as a pre-recorded virtual tour experience of each of the discovery pods, Destination Exploration(Space, Earth, Community), All Things Living(Amazing Me, Greenhouse, Animals), or All Around the World(Polar, Ocean, Tropics) with an educational instructional plan for each room of the pod.

Our Early Scholars Academy staff have selected some of the most engaging activities from our in-person educational visit experiences to have the students complete during the recording. Each virtual visit recording will have the regular discovery room introduction, two activities to expand on the instructional learning introduction, and a social/emotional activity. The ESA has also supplied two additional extension activities for the student to complete on their own with either their teachers or parents.

**Early Scholars Academy**  
Education Service Center, Region 2
